

Patent Attorneys / Trainees – Life Science / Chemistry

We are expanding our business in Stockholm. Consequently, we are recruiting talented, ambitious patent attorneys or patent attorney trainees equipped with a good sense for business and commercialization of R&D.

HØIBERG is one of Europe's leading and most respected patent law firms in the field of intellectual property rights. We are the preferred partners of a wide range of world-class tech, biotech/medtech and foodtech startups and R&D intense companies and universities around the world.

Being a patent attorney requires a high intellectual capacity and excellent analytical skills. We appreciate minds that are equipped with a curiosity for science and technology even outside your core area of expertise.

You preferably have a PhD within life science or medical/nano technology. If you don't, please make your case as to why you would be a good fit without one!

Your duties will include drafting and prosecution of patent applications, analysis of patentability, assessment of infringement and validity of patents, strategic IP counselling as well as assistance with licensing agreements, IP due diligence, litigation, etc.

You are a skilled communicator and aim to provide excellent and accurate service to your clients. You speak and write English and Swedish fluently, and knowledge in additional languages is a merit. You master the spectra from detail to the big picture. Protecting and enforcing intellectual property rights can be a lengthy process that requires both quick action and great patience. We expect you to be ready to defend our clients' rights with the same passion as if the idea was your own.

In the absence of prior experience with patents, you will be offered a comprehensive training program during the initial 3-5 years leading to the degree of European Patent Attorney (EPA). A part of the training is conducted within the framework of your daily work, but you will also need to allocate a part of your private time to patent training during the coming years. A part of the training program will occur at HØIBERG's headquarters in Copenhagen.

We offer - An international and flexible workplace with an informal tone, attractive employment conditions and a salary corresponding to your qualifications. We are looking to fill this role beginning in August or September, 2021.

Applications should be sent by e-mail to job@hoiberg.com and marked "Patent Attorney Stockholm" in the subject field **as soon as possible and no later than May 15th, 2021**. Candidates may be invited for an interview on an ongoing basis. Please note that the application must be in English and should preferably be forwarded with copies of your university transcripts. If you want to know more, you are welcome to contact Jens Viktor Nørgaard or Peter Holm at telephone number (+45) 3332 0337.

HØIBERG is a full-service patent law firm providing services within the fields of Intellectual Property Rights (IPR), including Patents, Designs, IPR Strategy, License Agreements, Due Diligence, Oppositions and Appeals. HØIBERG was founded in 1995 and has, since then, experienced strong growth. We have offices in Copenhagen, Stockholm and Aarhus, as well as representations in Lund and Malmö. The clients of HØIBERG include a wide variety of companies, start-ups and researchers from the University and Hospital environments.
